Amtrak's South Shore Service trains from Boston to New York City run along the South Wales Main Line. The line was electrified in 1963, and freight operations ceased in 1983. In 2008, the Welsh Assembly Government announced that the line will be upgraded for the high speed railway called the Swansea Bay Catalytic Corridor. The project was completed in 2013, and the Catalytic Corridor will run along the line for 50 miles from Swansea to Carmarthen, although electrification and new stations have not been completed yet. In the Welsh language, the word for rail is (). I would like to load a bunch of scripts in the order they are written in the page, in this case I would like to load jquery first. I don't know why this seems like it would not work, but it does not. It causes an error "Javascript seems to be disabled in this browser." I also tried.htaccess but it did not help. Thanks! A: Try to add an opening script tag: Don't use relative paths in the script tag. Q: javascript constructor prototype I have created a constructor with the following prototype (it is working just fine): function Fetch(url) { this.url = url; this.data = {}; this.headers = {}; } Fetch.prototype.fetch = function() { var _this = this; $.ajax({ url: _this.url, 82157476af
